SUMMARY

Shipped Rishi Reader to the App Store for iPhone, iPad, and Mac, and deployed customer systems for lending and inventory operations. Full-stack product engineer with 7+ years of non-overlapping professional software delivery, working in TypeScript, React, Node.js, and PostgreSQL. At Fidexa, I own commercial product work from domain modelling through deployment and support.

CORE SKILLS

Full stack: TypeScript, React, Next.js, Node.js, REST APIs, PostgreSQL, SQL, relational data modelling, Prisma, Drizzle

Business and delivery: ledger design, role-based access, audit trails, technical documentation, AWS Lambda, API Gateway, Cloudflare Workers, Vercel, GitHub Actions CI/CD, Vitest, Cypress, Sentry monitoring

Product and AI: Swift, SwiftUI, EPUB/PDF workflows, OpenAI, Vercel AI SDK, retrieval-grounded product features

EXPERIENCE

Founder and Product Engineer, Fidexa LLC

Apr 2025 to Present | Remote

- Founded and run an independent product studio, owning discovery, domain modelling, product decisions, implementation, deployment, technical documentation, and support for deployed customer systems and public releases.
- Shipped Rishi Reader to the App Store for iPhone, iPad, and Mac. Android is planned, not released.
- Built and deployed a lending operations system for a customer business. Chose a ledger-based model and exact decimal money math for reducing-balance interest, payment allocation, investor capital, approvals, role-based access, audit trails, and financial exports.
- Built and deployed an inventory and trade system for an import and retail business. Modelled procurement through retail in Supply, Store, and Shop modules sharing a double-entry ledger, so stock and value changes can be traced across the workflow.

Full-Stack Developer, Dabble Lab

Oct 2022 to Present | Remote, US team

- Build and maintain web applications and conversational AI products for US-based clients, delivering React/Next.js interfaces, Node.js endpoints, integrations, LLM workflows, and production issue investigation.

Code Reviewer and Student Mentor, Microverse

Jan 2022 to Oct 2022 | Remote

- Mentored junior web developers through code review and technical support in a structured full-stack program.

Software Developer, FEMME Agencies

Jul 2018 to Jan 2021 | Uganda

- Built a unified API for web and mobile applications, plus a web application with database architecture and CI/CD workflows.

Web Developer, Sustainable and Greener World

Jan 2020 to Jan 2021

- Built and maintained the organization's web presence, delivered features, and resolved issues directly with non-technical stakeholders.

EDUCATION

Bachelor of Engineering (BE), Civil Engineering

Kyambogo University | Jan 2016 to Jan 2020
