## SUMMARY

Senior full-stack/product engineer with 5+ years building and shipping web, mobile, desktop, and AI products. I work mainly in React, Next.js, TypeScript, Node.js, and serverless systems, with production experience in AWS, Cloudflare Workers, Vercel, Postgres, and native Apple development. In 2026 I shipped Rishi Reader to the App Store and deployed production accounting platforms for lending and inventory businesses. I run Fidexa, where I take products from domain modeling to deployment and support.

## CORE SKILLS

Frontend: React 19, Next.js 16 (App Router, RSC, Server Actions), TypeScript, JavaScript (ES2024), Redux, HTML5, CSS3, Tailwind CSS, responsive design, accessibility

Backend: Node.js, Python (scripting), Ruby on Rails, REST, tRPC, typed APIs, serverless functions

Cloud and Data: AWS Lambda, API Gateway, S3, Cloudflare Workers, Postgres, Prisma, Drizzle, Redis, Docker, Vercel, GitHub Actions, Git

Native and AI: Swift, SwiftUI, Mac Catalyst, native Apple development, OpenAI (Chat, TTS, Agents SDK), Vercel AI SDK, retrieval-augmented agents, Zod-typed extraction

## EXPERIENCE

### Founder and Lead Developer, Fidexa LLC

Apr 2025 to Present · Remote

- Run the studio solo: technical strategy, domain modeling, client intake, design, build, deployment, and support.
- Shipped Rishi Reader to the App Store as a native Apple product spanning iPhone, iPad, Mac, CarPlay, and connected Apple Watch experiences, with Android expansion planned.
- Deployed two production client platforms: a ledger-backed money-lending system and a multi-module inventory and trade system used by real businesses.
- Designed and shipped the studio site on Next.js 16, React 19, and Tailwind v4, hosted on Vercel with per-branch preview deployments.

### Full-Stack Developer, Dabble Lab

Oct 2022 to Present · Remote (US team)

- Build and maintain web applications and conversational AI products for US-based clients on a distributed team.
- Ship features end to end: React or Next.js interfaces, Node.js server endpoints, third-party APIs, and LLM integrations.
- Troubleshoot production issues, ship hotfixes, and collaborate asynchronously across time zones.

### Frontend Engineer, Microverse

2022 · Remote

- Built and deployed 10+ React, Redux, and JavaScript projects consuming live third-party APIs.
- Worked through daily pair programming, code review, async standups, and Git/GitHub flow with international partners.

### Web Developer, Sustainable and Greener World

Jan 2020 to Jan 2021

- Built and maintained the organization's web presence, shipped new features, and resolved site issues directly with non-technical stakeholders.

## SELECTED PROJECTS

### Rishi Reader, Apple Reading Platform

Swift · SwiftUI · Mac Catalyst · EPUB/PDF · OpenAI · native Apple development

Production Apple ecosystem reading platform shipped to the App Store for iPhone, iPad, Mac, CarPlay, and connected Apple Watch experiences. It supports EPUB and PDF reading, read-aloud, highlights, sync, sharing, and AI chat grounded in the current book. Android expansion is planned.

### Money Lending Management System

Next.js · React · TypeScript · Postgres · Drizzle · Better Auth · BigNumber.js

Production lending platform built around an accounting ledger. It handles reducing-balance interest, exact money math, payment allocation, investor capital, borrower risk watchlists, review-then-confirm approvals, role-based access, and P&L plus Balance Sheet exports.

### Inventory and Trade Management System

TanStack Start · React · TypeScript · Cloudflare Workers · Postgres

Production platform used by a real import and retail business. Supply, Store, and Shop modules share a double-entry ledger covering procurement through retail, with RMB/USD/UGX costing, POS, stock control, loss detection, and audit trails.

### AI Scraping Ecosystem

Next.js · TypeScript · AWS Lambda · API Gateway · S3 · npm · Zod

Production SaaS split into a dashboard, the published `scrap-ai` extraction package, and an AWS Lambda backend. It uses schema-validated LLM extraction, async webhooks with HMAC verification, usage metrics, and PDF archival.

### Apartment Manager, Property Management SaaS

Next.js · TypeScript · PostgreSQL · Prisma · Better Auth

Multi-tenant property platform with recurring rent billing, expense tracking, role-based access, email-verified auth, and CSV/Excel exports.
