Farid Matovu

Senior Frontend Engineer | React, TypeScript & Product Interfaces

Remote | UTC+3 | matovu90@gmail.com
Portfolio | LinkedIn | GitHub

SUMMARY

Frontend and product engineer with **7+ years of non-overlapping professional software delivery**, including about four years building production React and TypeScript products. I turn detailed product needs into responsive, data-rich interfaces and carry features through API integration, testing, release, and production support. Recent work includes operational and financial platforms used by real businesses, an Apple reading product shipped to the App Store, and AI-enabled client applications.

CORE SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, responsive UI, accessible interaction patterns

Product interfaces: Data-rich dashboards, operational workflows, forms, tables, search, reusable components, frontend state, loading/error/empty states

Integration and data: REST APIs, Node.js, PostgreSQL, relational data modelling, authentication, permissions, third-party integrations

Quality and delivery: Vitest, Cypress, Playwright, code review, Git, CI/CD, production debugging, deployment, monitoring, documentation

PROFESSIONAL EXPERIENCE

Founder and Lead Developer — Fidexa LLC

Apr 2025–Present | Remote

- Lead product discovery, interface design, implementation, testing, deployment, monitoring, and support for products used by real customers.
- Designed and deployed an inventory and trade platform for an import and retail business, connecting procurement, stock control, point of sale, multi-currency costing, permissions, reporting, and audit history.
- Built production interfaces for a ledger-backed lending system, including borrower and investor workflows, approvals, collections, risk watchlists, reporting, and auditable financial exports.
- Shipped Rishi Reader to the App Store for iPhone, iPad, and Mac; the codebase also includes connected Apple Watch and CarPlay experiences.

Full-Stack Developer — Dabble Lab

Oct 2022–Present | Remote | Distributed US team; concurrent with Fidexa

- Build React and Next.js interfaces, reusable UI patterns, Node.js services, third-party integrations, and AI-enabled workflows for client products.
- Translate product requirements into responsive, maintainable user journeys; deliver through review, automated testing, deployment, and production support.

PROFESSIONAL EXPERIENCE (CONTINUED)

Code Reviewer and Student Mentor — Microverse

Jan 2022–Oct 2022 | Remote

- Reviewed web-development projects and coached developers through actionable code feedback, debugging, and implementation support.
- Built and deployed React, Redux, and JavaScript applications using live APIs.

Software Developer — FEMME Agencies

Jul 2018–Jan 2021 | Uganda

- Built a database-backed web application and a unified API for web and mobile clients; contributed to CI/CD and stakeholder-facing web delivery.

SELECTED PRODUCTION WORK

Inventory and Trade Management System — Fidexa

React | TypeScript | TanStack Start | PostgreSQL | Cloudflare Workers

Production platform used by an import and retail business. Covers procurement, stock control, point of sale, multi-currency costing, reporting, permissions, loss controls, and audit trails.

Live platform | Repository

Money Lending Management System — Fidexa

React | TypeScript | Node.js | PostgreSQL | Drizzle

Production lending software built around an accounting ledger, supporting exact-money workflows, repayment allocation, investor capital, approvals, collections, reporting, and auditable records.

Live platform | Repository

Rishi Reader — Apple reading product

Swift | SwiftUI | Apple platforms

Native reading product available on the App Store for iPhone, iPad, and Mac. The codebase includes connected Apple Watch and CarPlay experiences; Android is planned, not released.

App Store | Repository

EDUCATION

Bachelor of Engineering (BE), Civil Engineering — Kyambogo University | 2016–2020

Full-Stack Web Development — Microverse | 2022
