Farid Matovu

Senior Frontend Engineer | React, TypeScript | Enterprise Product Interfaces

Kampala, Uganda (GMT+3) | +256 705 222 144 | matovu90@gmail.com

Portfolio | LinkedIn | GitHub

Summary

Senior frontend and product engineer with **7 years 5 months of documented software-development contribution** across employment and structured full-stack training (89 distinct calendar months, counted inclusively with overlaps removed). This includes **6 years 8 months in software-development employment** and 9 additional distinct training and peer-review months (Jan–Sep 2022; October overlaps with Dabble). I build production React and TypeScript interfaces for complex operational and financial workflows—experience relevant to eQuantic Space and Finance—and carry features from product requirements and API integration through testing, deployment, and support. Recent launches include two live Fidexa platforms and Rishi Reader, shipped to the Apple App Store.

Frontend and Product Skills

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, responsive interfaces, reusable components

Product interfaces: data-rich dashboards, operational workflows, forms, tables, search, interaction design, loading/error/empty states, accessible interaction patterns

Integration and data: REST APIs, asynchronous data flows, Node.js, PostgreSQL, relational modeling, authentication, permissions, audit trails

Quality and delivery: Vitest, Cypress, Playwright, Git, CI/CD, GitHub Actions, Cloudflare Workers, Vercel, production debugging, deployment, monitoring

Professional Experience

Founder and Lead Developer | Fidexa LLC

Apr 2025–Present | Remote

- Own product discovery, workflow design, implementation, testing, deployment, monitoring, and support for production software used by real customers.
- Built and deployed inventory/trade and ledger-backed lending products with React interfaces for business operations, financial workflows, permissions, and auditability.
- Shipped Rishi Reader to the App Store for iPhone, iPad, and Mac; the codebase also includes connected Apple Watch and CarPlay experiences.

Full-Stack Developer | Dabble Lab

Oct 2022–Present | Remote | Distributed U.S. team; concurrent with Fidexa since Apr 2025

- Build React and Next.js interfaces, reusable UI patterns, Node.js services, third-party integrations, and AI-enabled workflows for client products.
- Translate product requirements into maintainable user journeys across frontend, APIs, and data workflows; deliver through review, automated testing, deployment, and production support.

Professional Experience (continued)

Code Reviewer and Student Mentor | Microverse

Jan–Oct 2022 | Remote | Training/peer review; 9 distinct months after Oct overlap with Dabble Lab

- Reviewed full-stack web-development projects and coached developers through code feedback, debugging, and implementation support.
- Built and deployed React, Redux, and JavaScript applications using live APIs.

Software Developer | FEMME Agencies

Jul 2018–Jan 2021 | Uganda

- Built web and mobile application features and a unified Node.js/TypeScript API for database-backed workflows.
- Contributed to CI/CD and stakeholder-facing web delivery.

Selected Product Work

Inventory and Trade Management System | Fidexa

React, TypeScript, TanStack Start, PostgreSQL, Cloudflare Workers

Production platform used by an import and retail business. Covers procurement, stock control, transfers, point of sale, multi-currency costing, reporting, permissions, and audit trails. Live platform | Case study

Money Lending Management System | Fidexa

React, TypeScript, Node.js, PostgreSQL, Drizzle

Production lending software built around an accounting ledger, supporting exact-money workflows, repayment allocation, investor capital, approvals, collections, reporting, and auditable records. Live platform | Case study

Rishi Reader | Native Apple Product

Swift, SwiftUI, Apple platforms

Native reading product available on the App Store for iPhone, iPad, and Mac. The codebase includes connected Apple Watch and CarPlay experiences; Android is planned, not released. App Store | Product

Education

Bachelor of Engineering (BE), Civil Engineering | Kyambogo University | 2016–2020

Full-Stack Web Development | Microverse | 2022
